Board of Directors’ report

The board of directors and CEO hereby submit this annual report and consolidated annual accounts for the financial year 2019 for EnergyO Solutions Russia AB (publ), corporate identity number 556694-7684.

“EOS AB” or “the Company” refers to EnergyO Solutions Russia AB, the parent company. “EOS Ltd” refers to EnergyO Solutions Russia (Cyprus) Limited, the subsidiary of EOS AB. “EOS Russia” or “the Group” refers to all companies to which EOS AB is parent company.

EOS Russia

EOS Russia was founded in April 2007 in order to capitalize on investment opportunities arising as a result of the deregulation, restructuring and privatization of the Russian electricity industry. A comprehensive reform program is gradually being implemented, affecting all elements of the sector: structure, ownership and electricity pricing. The reason for the reform is the considerable investment need that has emerged as a result of rapidly increasing electricity demand. EOS Russia utilises the expertise, experience and network that the founders possess to identify investment opportunities within the power sector.

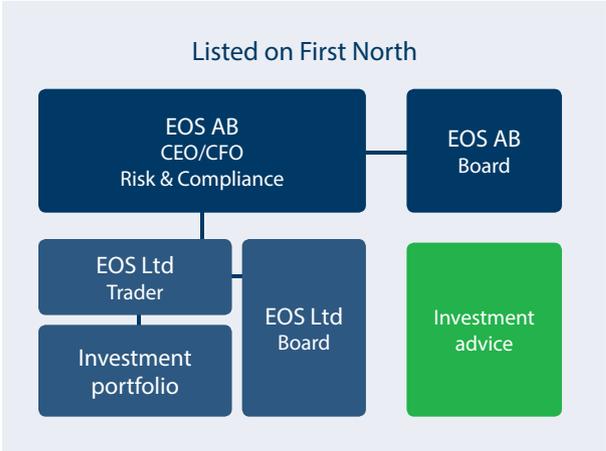

Group structure

EOS AB is the Group’s parent company and is headquartered in Stockholm, Sweden. The board of EOS AB consists of three members. The CEO is based at the headquarters of EOS Russia. The CEO is also the acting CFO of the Group as of November 25th 2009 and also serves as Head of Risk and Compliance since January 1st 2014.

EOS Ltd is a subsidiary of EOS AB and is located in Limassol, Cyprus. The Board of Directors of EOS Ltd consists of five members. EOS Russia’s trader is based on Cyprus.

Operations began on April 17, 2007 and EOS AB was listed on the First North marketplace, part of Nasdaq First North Growth Market Stockholm (Nasdaq FNGM) on June 25, 2007.

The shares in the company are issued and traded in SEK and the Group investments are in USD.

Operational structure and management

The board of EOS AB is responsible for the group’s overall guidelines, strategies and operational policies and the management team of EOS Russia has overall responsibility for ongoing operations, financial control, performance, monitoring and information issues. As of 2014, the management team consists of the CEO only.

EOS AB raises capital for EOS Russia and also provides the Group with corporate and administrative functions such as financial reporting, marketing and investor relations. The Board of EOS AB sets the scope for investments and leveraging for EOS Russia.

EOS Ltd makes all investment decisions within the framework set by the parent company. All investments are conducted entirely by the subsidiary, which holds the complete investment portfolio of EOS Russia.

E

EOS Russia's financial performance

EOS Russia recorded a net loss from investing activities of SEK 112 million (-135) for the full year. Operating expenses amounted to SEK -11.9 million (-9.4) for the full year.

Net financial items amounted to SEK -5.5 million (-0.3) for the full year.

The net profit for EOS was SEK 94 million (-145) for the full year. Net profit per share was SEK 2.45 (-3.59).

EOS Russia's net asset value at December 31, 2019 was SEK 963 million (899). The net asset value was negatively impacted by accumulated exchange rate translation differences of SEK -160 (-191).

EOS AB

The parent company's income for the period amounted to SEK 7.8 million (9.7). Operating expenses amounted to SEK -6.7 million (-4.9) for the period. Net financial items amounted to SEK 124.9 million (-68,3) for the period of which 130.3 (-68,1) is a reversal of a writedown of shares in group companies. The net profit for the period was SEK 125.9 million (-63,5).

The total number of shares outstanding at December 31st, 2019 was 37,106,719 (40,307,484).

Significant events during 2019 and after the reporting period

May 2019

At the annual general meeting on May 21, 2019, the following board proposals were adopted:

- To renew the board's authorization to resolve on synthetic buybacks of own shares to a maximum of 29.9 per cent of all shares in the company prior to the next annual general meeting.

COVID-19

The macroeconomic outlook has changed dramatically with the spread of the coronavirus and the subsequent lockdowns of businesses and societies. The market has reacted with sharply falling stock prices amid worries of a contraction of the world and local economy. At this point in time, it is too early to quantify the effect on medium to long term valuation of the holdings in EOS' portfolio.

Shareholder structure

At the end of 2019, EOS AB had 37,106,719 shares outstanding. The majority of EOS AB's shares are held by institutional investors and a large proportion of the shares are owned by individuals or legal entities domiciled outside of Sweden. Shareholders holding more than 10% were Euroclear (34.0%) and BNY Mellon (12.2%).

Risk and risk management

The Board of Directors of EOS AB is ultimately responsible for the management of risks to which EOS Russia is exposed. EOS Russia's investment strategy is implemented by EOS Ltd, based on Cyprus, through which our investments are made and owned. EOS Ltd makes all investment decisions within the framework set by the parent company. This means that the board of EOS Ltd, based on recommendations from an external adviser, makes decisions about the sale and purchase of Russian shares within the electricity sector. The execution of decisions made by the board of EOS Ltd is carried out by the trader or either a director or employee, on the mandate of the board of EOS Ltd.

EOS Russia has assessed its risk exposure with the objective to identify key risks.

The major risks were defined to be financial risk and country and sector-specific risk. The financial risk includes price risks, interest rate risk, liquidity risk and credit risk.

Through the chosen investment strategy, EOS Russia has a high exposure to country-specific risk factors for Russia, such as political, economic and legal risks. In addition, EOS Russia is highly exposed to risks associated with investing in the Russian electricity sector. While these risks are high for EOS Russia, they are also part of its business concept.

EOS Russia depends on the continued services and performance of our founders, management and key personnel, either through employment or the management contract.

Through its operations, the Group is exposed to various types of financial risks, which are assessed and monitored by EOS Russia on a daily basis, see Note 18. Price risk is the risk that the fair value of or future cash flow from a financial instrument will vary due to changes in market prices. In EOS Russia's operations, share price risk (other price risk) and exchange rate risk are the most important price risks.

Share price risk is the risk that the fair value of our future cash flows from a share will vary due to changes in market prices. Share price risk is a central risk in the Group's operations, since these consist of making investments in various forms of shares and share-based derivatives in the Russian stock market, with a specific focus on the Russian electricity sector. Share prices of shares held in the portfolio will fluctuate. This risk is part of EOS Russia's business concept and will generally not be hedged.

Exchange rate risk is the risk that exchange rate fluctuations may have a negative impact on our statement of comprehensive income, statement of financial position and/or cash-flow.

EOS Russia's exchange rate risks largely derive from translation exposure that arises from recalculation of a foreign subsidiary's assets and liabilities (USD) to EOS AB's functional currency (SEK), known as recalculation exposure. EOS Russia also has certain exposure to the Russian ruble (RUB),

in respect of those shares whose underlying price is RUB but are priced and traded in USD. Translation-related exposure is not hedged.

Interest rate risk is the risk that the fair value or future cash flows from a financial instrument will vary due to changes in market interest rates, and for EOS Russia's operations, the interest rate risk arises when surplus liquidity is invested temporarily in interest-bearing securities. Interest rate risk also arises when EOS Russia finances operations by leveraging the stock portfolio. These interest rate risks have generally been low, because the holding period has generally been short in respect of investments in interest-bearing securities and has been very short in respect of temporary leveraging of the stock portfolio.

Liquidity risk is the risk that EOS Russia will be affected negatively by inefficient handling and control of cash and payment flows, in part because investments can only be converted to liquid funds with a certain loss of value or time. Group management's view is that EOS Russia has sufficient liquidity for current requirements.

Credit risk is the risk that a party to a financial instrument cannot fulfill an obligation and thereby causes a financial loss for the counterparty. Credit risk can arise if EOS Russia enters into derivative agreements, and in certain cases, if EOS Russia invests temporary liquidity surpluses in interest-bearing securities. In EOS AB, credit risks mainly arise in connection with short-term lending to the subsidiary and with other current receivables from subsidiaries.

Investment portfolio in securities

During 2007 and 2008, EOS Russia raised a total of SEK 4,841 million in several placements in kind and cash.

Almost all investments were placed in UES (Unified Energy Systems) ahead of the company's break-up on July 1st 2008.

In July and August 2008, EOS received its pro-rata stakes in the by then liquidated UES. The portfolio divided by sub-sector consisted of approx. 65% in generating assets (OGKs, TGKs and hydro), 14% in distribution assets (MRSKs), 16% in transmission (FGC) assets and 5% in intergrated (IRAO) and other.

The portfolio has since been gradually reweighted towards the sector that, according to the view of EOS Russia,

for the moment is offering the most attractive relative value within the sector. As of December 31st 2019 the portfolio consisted of mainly distribution, see note 19.

Dividends

According to EOS AB's Balance Sheet, the following amount is available for distribution (TSEK):

Share premium reserve	4,404,054
Retained earnings	-3,609,783
Net loss for the year	125,928
Total	920,199

The Board of Directors of EOS AB propose that these earnings be distributed as follows (TSEK):

Dividends paid to shareholders	0
To be carried forward	920,199
Total	920,199

Notes to the financial statements

Note 1 Accounting policies

Compliance with accounting standards and legal requirements

The consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and interpretations announced by the International Financial Reporting Interpretations Committee (IFRIC), as approved by the EC Commission for application within the EU. In addition, the Swedish Financial Reporting Board's recommendation RFR 1, Supplementary Accounting Rules for Groups is applied.

The Company applies the same accounting principles as the Group, except in the cases stated below in the section "Company accounting principles". The deviations that occur between the accounting policies of the Company and the Group is attributable to limitations to apply IFRS in EOS AB due to the Annual Accounts Act and in certain cases for tax reasons. The Annual Report and consolidated accounts were approved for publication by the Board of Directors on April 27, 2020. The Group's statement of comprehensive income and statement of financial position and EOS AB's income statement and balance sheet are subject to approval by the Annual General Meeting on May 19, 2020.

The basis of measurement for establishing the financial reports of the Company and the Group

Assets and liabilities are measured at historical cost, except for certain financial assets and liabilities measured at fair value.

Functional and reporting currency

The Company's functional and reporting currency is Swedish kronor, which is also the reporting currency of the Group. This means that the financial statements are presented in Swedish kronor. Unless otherwise indicated, all amounts are rounded off to the nearest thousand SEK. By rounding the numbers in tables, totals may not always equal the sum of the included rounded numbers.

Assessments and estimates in the financial statements

Preparation of the financial statements in accordance with IFRS requires that the Group management makes assessments and estimates and also makes assumptions that affect the application of the accounting policies and the recognised amounts of assets, liabilities, revenue and expenses.

The actual outcome may deviate from these assessments and estimates.

The assessments and assumptions are reviewed regularly. Changes in estimates are reported in the period when the change is made if the change only affects this period, or in the period when the change is made and future periods if the change affects the period in question and future periods.

(i) Significant assessments in applying the Group's accounting principles

The assessments made by Group management in applying the Group's accounting principles that have the most significant influence on the financial statements are as follows:

- EOS Russia's investment portfolio comprises shares that, according to the assessment of Group management, do have prices quoted on an active market.
- EOS AB does not meet the definition of an investment company according to IFRS 10

(ii) Important sources of uncertainty in estimates

The important sources of uncertainty in estimates made that carry a significant risk of a material adjustment to the carrying amounts of assets and liabilities in the next financial year are as follows:

- The calculation of the provision for the performance fee, see note 4. This uncertainty is primarily related to uncertainty in the assumption on volatility of EOS Russia's share price.

New and changed IFRSs applicable from 1 January 2019

The new standard IFRS 16 Leases is applied from January 1, 2019. IFRS 16 concerns the accounting for rental and lease agreements for both lessors and lessees.

EOS Russia has used the new standard prospectively and therefore use the transition method to apply the standard retrospectively with the cumulative effect of initially applying the standard as an adjustment to the opening balance of retained earnings as of January 1, 2019.

New and changed IFRSs not yet applied

From January 1, 2020 there are amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to clarify the definition of material. These amendments and

other known changes to IFRS and IFRIC to be applied in the future are not expected to have any significant impact on the Group's reporting.

Segment reporting

A segment is component of the Group that provides goods or services (business activities) from which it may earn revenues and incur expenses and for which discrete financial information is available. The operating results are reviewed regularly by the entity's chief operating decision maker to assess the performance and make decisions about resources to be allocated to the segments. EOS Russia does not review its operating results divided by different segments and does not therefore consist of more than one segment. Furthermore the Group does not have any revenues from external clients that may be divided between different products and services or different countries. In addition the Groups non-current assets are immaterial. Hence it follows that EOS Russia does not provide segment reporting.

Basis of consolidation

The consolidated financial statements comprise EOS AB, and its subsidiaries. A subsidiary is a company which EOS AB controls. Control gives an indirect or direct right to shape a company's financial and operational strategies with the purpose of obtaining economic benefits.

Subsidiaries are included in the consolidated financial statements using the purchase method. According to the purchase method, the acquisition is considered a transaction by which the group indirectly acquires the assets of the subsidiary and assumes its liabilities and contingent liabilities. An acquisition analysis in connection with the acquisition establishes both the cost of acquisition and the fair value of acquired identifiable assets and liabilities and contingent liabilities assumed. The cost of acquisition consists of the fair value of assets transferred, liabilities incurred or assumed and for equity instruments issued as consideration for acquired net assets directly attributable to the acquisition.

Where the cost exceeds the net fair value of acquired identifiable assets and liabilities, the difference is accounted for as goodwill. When the difference is negative, it is directly recognised in profit or loss. A subsidiary is included in the consolidated financial statements from the time of acquisition until the date on which control ceases.

Intragroup assets, liabilities, income, expenses and unrealised profits and losses arising from intragroup transactions between group companies are eliminated in their entirety.

EOS Russia is not involved in any entities that are to be classified as associated companies, joint ventures or special

purpose entities.

Foreign currency transactions

Transactions in foreign currency are translated to the functional currency at the rate of exchange on the transaction date. Monetary assets and liabilities in foreign currency are translated to the functional currency at the exchange rate at the end of the reporting period. Foreign currency differences that arise from translations are recognised in profit or loss. Non-monetary assets and liabilities recognised at historical cost are translated at the exchange rate on the transaction date. Non-monetary assets and liabilities reported at fair value are translated to the functional currency at the rate prevailing on the date of the determination of fair value. Foreign exchange rate gains and losses on investments in equity instruments that are traded in Ruble are presented in the profit or loss for the period as net profit from investing activities. All other foreign exchange rate gains and losses are presented as finance income or finance expenses.

Foreign operations

Assets and liabilities in foreign operations are translated from their functional currency to the reporting currency of the Group (Swedish krona), at the exchange rate at the end of the reporting period. Income and expenses of foreign operations are translated to Swedish kronor at an average exchange rate comprising an approximation of exchange rates prevailing at each transaction date. Translation differences that arise from currency translation of foreign operations are recognised in other comprehensive income and is accumulated in the translation reserve in equity.

Change in value of securities

Changes in value of securities, which are reported as revenue in operating income, consist of both realised and unrealised changes in value of securities in the portfolio management. Realised changes in value refer to the difference between settlement received and the value at the beginning of the period. Unrealised changes refer to the changes in the value of the securities reported in EOS Russia's consolidated statement of financial position at the end of the reporting period. This item also includes the changes in value of equity options.

Operating leases

The Group has only one operating lease agreement. Costs regarding operating lease agreements are recognised straight-line in the profit or loss over the leasing period.

Finance income and expenses

Finance income can comprise interest income on temporary excess liquidity that is invested in fixed-income securities and that in the accounts is classified as financial assets available for sale. Finance income also includes gains from the divestment of such items and gains in the change in value of currency futures used for financial hedging of the price of shares. For more information, see the “Financial instruments” section of the accounting principles.

Finance expenses comprise interest expenses on loans, losses in the change in value of currency futures used for financial hedging of the price of shares and impairment of financial assets.

Exchange rate gains and losses are reported at net amount.

Taxes

Income tax expense comprise current and deferred taxes. Income tax is recognised in profit or loss for the period except to the extent that the underlying transaction is recognised in other comprehensive income or directly in equity in which case the tax is recognised in other comprehensive income or in equity.

Current tax is tax that is to be paid or received for the current year by applying the tax rates enacted or substantively enacted at the end of the reporting period. Current tax also includes adjustments to current tax attributable to previous periods.

Deferred tax is recognised providing for temporary differences between amounts used in financial reporting and taxation. The valuation of deferred tax is based on how underlying assets or liabilities are estimated to be accounted for or regulated. Deferred tax is measured by applying tax rates or tax regulations enacted at the end of the reporting period. Deferred tax assets related to deductible temporary differences and loss carry-forwards are only reported to the extent that it is likely that they will be utilised. The value of deferred tax assets is reduced when it is no longer deemed likely that they can be utilised.

Financial instruments

A financial asset or a financial liability is recognised in the statement of financial position when the company becomes party to the instrument’s contractual terms. A financial asset is derecognised in the statement of financial position when the rights in the agreement have been realised, become due or when the company loses control over them. This applies also for part of a financial asset. A financial liability is derecognised in the statement of financial position when the obligations in the contract are fulfilled or extinguished in some other way. This applies also for part of a financial liability.

Acquisitions and divestments of financial assets are recognised on the transaction date, which is the date when the

company commits to acquire or divest the asset.

When a financial asset or financial liability is recognised initially, EOS Russia measures it at its fair value plus, in the case of financial assets and liabilities not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or liability. For financial instruments measured at fair value through profit or loss, transaction costs are recognised directly as expenses when they are incurred.

Financial instruments recognised in the statement of financial position on the asset side include cash and cash equivalents, trade receivables, shares and participations in investing activities and derivatives. On the liabilities side, financial instruments include trade payables, loans and derivatives.

A financial asset and a financial liability are offset and recognised as a net amount in the statement of financial position only if there is a legal right to offset the amount and there is an intention to settle the items as a net amount or to realise the asset and settle the liability at the same time.

Categories of financial instruments and measurements

(i) Financial instruments held for trading

Investments in equity instruments are classified as held for trading and are measured at fair value (without any deductions for future transaction costs) with changes in fair values recognised in the profit or loss. Being the main activity of EOS Russia, the change in value of and dividends received from these securities are recognised as revenue in operating income.

Stand-alone and any potential embedded derivatives that are not closely related to the host contract also belong to the category financial instruments held for trading and are measured at fair value through the profit or loss.

Derivatives utilised for financial hedging may be used in the form of equity options and currency futures. The change in value of equity options is reported in “Net change in value of securities.” Changes in the value of currency futures are reported in “Finance income” and “Finance expenses”, since these futures are utilised to hedge financing.

(ii) Loans and receivables

Loans and receivables in the statement of financial position consist of cash equivalents and receivables. Loans and receivables are measured at amortized cost less charges for impairment. A loan and receivable is regarded by the company as impaired and impairment losses are incurred and recognised if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset and that loss event

has an impact on the net present value of the expected cash flows of the financial asset including the fair value of any collateral. An impairment is recognised and accounted for with an amount corresponding to the best estimate considering all available information prior to the release of the financial statements, with the conditions prevailing at the end of the reporting period. Objective evidence that a financial asset or group of assets is impaired includes observable data that comes to the attention of the company e.g.

- Significant financial difficulty of the obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it is becoming probable that the obligor will enter bankruptcy or other financial reorganisation

(iii) Financial assets available for sale

In cases when the Group is temporarily over-funded awaiting the appropriate opportunity for additional investments, the liquidity surplus is invested in interest rate bearing financial instruments and the investments for measurement and recognition purposes, belong to the category financial assets available for sale, since the Group has no intention to hold the securities to maturity. The instruments are accordingly measured at fair value with changes in fair values recognised in other comprehensive income and accumulated in the fair value reserve in equity.

(iv) Other financial liabilities

Financial liabilities in the statement of financial position are measured at amortised cost.

Valuation at fair value

Financial instruments that are measured at fair value are, when possible, measured at fair value based on prices that are quoted on active markets. Potential transaction costs arising in conjunction with the divestment of assets are not taken into account.

Property, plant and equipment

Items of property, plant and equipment are measured at cost, less accumulated depreciation and any impairment losses. Cost includes the purchase price and any expenditure directly attributable to bringing the asset to a working condition for its intended use.

Impairment

The carrying amounts of the Company's and Group's assets are reviewed at each reporting date to determine whether there is an indication of impairment. IAS 36 is applicable for all other assets than financial assets which are in the scope of IAS 39.

If an indication exists, the recoverable amount of the asset is estimated (see below). When the asset does not generate cash flows that are largely independent from other assets and its fair value less costs to sell could not be estimated the Group estimates the recoverable amount of the cash generating unit to which the asset belongs.

An impairment loss is recognised if the carrying amount of an asset or its cash generating unit (group of units) exceeds its estimated recoverable amount. Impairment losses are recognised in profit or loss.

The recoverable amount is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessment of the time value of money and the risks specific to the asset.

An impairment loss within the scope of IAS 36 is reversed if there has been a change in the estimates used to determine the recoverable amount and the indication of impairment no longer exists. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognised.

Depreciation

Depreciation is made on a straight-line basis over the estimated useful life. The estimated useful life is assessed annually.

Property	40 years
Plant and equipment	5-10 years
Computers	3 years

Equity

Financial liabilities and issued equity instruments are classified and presented in accordance with the substance of the transactions rather than the legal form, in cases where substance and form diverge. Also payments from these instruments are classified in accordance with the financial substance of the contract.

Dividends

Dividends are reported as liabilities in the consolidated accounts after the Annual General Meeting has approved the dividend proposal.

Earnings per share

Earnings per share comprise profit or loss attributable to the Company's shareholders divided by the weighted average number of outstanding shares during the year.

Provisions

A provision is reported in the statement of financial position when there is an existing legal or informal obligation as a result of an event that has occurred, and it is probable that an outflow of resources will be required to settle the commitment and a reliable estimate of the amount can be made. The amount recognised as a provision is the best estimate of the amounts required to settle the existing commitment at the end of the reporting period. Where the value effect of time is material, the provision comprises the present value of the payments expected to be required to settle the commitment. The discount rate (or rates) is the interest rate before tax that reflects current market assessments of the time value of money and the risks associated with the liability.

Contingent liabilities

A contingent liability is reported when there is a possible obligation deriving from a past event and whose existence is confirmed only by the occurrence of one or more uncertain future events or when there is an obligation that is not reported as a liability or provision because it is not probable that an outflow of resources will be required.

Synthetical Repurchases

EOS AB intend to enter in a swap agreement with Pareto Securities to repurchase EOS shares (“synthetic buyback”). The arrangement means that the Bank purchases shares on the market and EOS will have to settle the difference between the Banks purchase price of the shares and the current market price of the shares unless the EOS AB shareholders meeting decides to reduce the share capital of the company in which case the purchase price of the shares will be paid to the bank. On a regular basis EOS AB transfers money to an account in the Bank which the Bank then uses to buy EOS shares on the market. The amount on the account is restricted for the outstanding trades that the Bank has carried out but not yet cleared.

EOS Russia recognizes the difference between the current share price at the balance sheet and the price paid by the bank as either an asset (if the current market price is higher than the purchase price) or liability (if the current market price is lower than the purchase price) and changes are recognised in profit or loss under the line item finance income/expense. The amount on the account is presented in the balance sheet line item Cash and cash equivalent/Cash and Bank and the amount used to buy EOS shares as a short term loan (other receivables).

If and when the shareholders meeting decides to redeem the shares to reduce the share capital this transactions is accounted for in the following manner; the share capital is

reduced with a nominal amount corresponding to the number of redeemed shares. The residual amount between the fair value of the underlying shares reduced by the nominal amount of the share capital reduces the share premium reserve.

The fixed fee component of the fee expenses is recognized immediately upon signing of the swap agreement. Fee expenses that accrue to the Bank for the services of purchasing EOS shares on the market are recognised when (i) services have been provided and (ii) if it is probable that the amounts have to be paid. One of the components in the fee expense is only payable to the bank if the shareholders meeting decides to reduce share capital and accounted directly as a debit to equity. The agreement with the Bank may be adjusted when new repurchase mandates are given by the Annual General Meeting and hence the different components may change or not be applicable. Such mandate was given by the Annual General Meeting on 15 May 2019.

EOS AB's accounting principles

EOS AB prepared its Annual Report in accordance with the Swedish Annual Accounts Act (1995:1554) and the Swedish Financial reporting Board's recommendation RFR 2.2 Accounting for Legal Entities. The RFR statements of the Board are also applied. RFR 2.2 entails that EOS AB in the Annual Report for the legal entity shall apply all IFRSs and statements as far as possible within the framework of the Annual Accounts Act and with respect to the connection between accounting and taxation. The Recommendation states the exceptions from and additions to IFRS that are to be applied.

Difference between the Group's and EOS AB's accounting principles

The differences between the Group's and EOS AB's accounting principles are stated below. The accounting principles for EOS AB described below were applied consistently to all periods presented in EOS AB's financial statements.

Classification and presentation

In accordance with RFR 2, a Company statement of comprehensive income is presented.

EOS AB's financial statements do not carry the same titles as the Group but, in accordance with RFR 2, still uses the income statement and balance sheet.

These are presented in accordance with the structure stipulated by the Annual Accounts Act. The difference is primarily the reporting of financial income and expenses, non-current assets and shareholders' equity.

Property, plant and equipment and long-term liabilities consists mainly of amounts that are expected to be paid

more than 12 months after the end of the reporting period. Current assets and short-term liabilities consists mainly of amounts that are expected to be paid more than 12 months after the end of the reporting period.

Subsidiaries

Participations in subsidiaries are reported at cost with deductions for any impairment losses. Dividends received are recognised as income in profit or loss.

EOS AB raises capital for EOS Russia via new share issues and EOS AB's board sets the scope for investments and leveraging for EOS Russia. The subsidiary EOS Ltd, located in Cyprus, makes all investment decisions within the framework set by the parent.

In the long term EOS Russia expects to finance its business principally without debt financing. EOS Russia may however in a special situation finance its portfolio with up to 40% debt. EOS plans to reinvest all future profits. In addition, further financing through cash share issues and issues in kind will be a possible way to increase the capital base.

The sources of the decrease in equity to SEK 963 million (899) during 2019 consisted of share redemptions of SEK -63 million(0), a reported profit of SEK 94 million (-145) and a translation profit of SEK 31 million (81).

EOS AB's share capital on December 31, 2019 consisted of 37,106,719 (40,307,484) ordinary shares with a ratio value of SEK 1.14 (1.05). As per 31 December 2019, 2,480,915 shares in EOS AB has been repurchased in the synthetic buy-back program.

Group

Other contributed equity

Pertains to shareholders' equity that has been contributed by the owners. The item includes premiums paid in conjunction with share issues.

Reserves

Translation reserve

The translation reserve includes all exchange-rate differences arising in the translation of financial statements from foreign operations that have prepared their accounts in a different currency to the currency in which the consolidated financial statements are presented. EOS AB and EOS Russia present their financial statements in SEK.

Retained earnings

Profit brought forward includes profit earned in EOS AB and its subsidiaries.

Unrestricted equity – the Company

Share premium reserve

When shares are issued at a premium, that is to say, when an amount higher than the ratio value of the shares is to be paid, an amount corresponding to the received amount that exceeds the ratio value of the shares shall be transferred to the share premium reserve. Amounts transferred to the share premium reserve are included in non-restricted shareholders' equity.

Retained earnings

Comprises non-restricted shareholders' equity for the preceding year after any distribution of profits has been paid. Net profit for the year, retained earnings and the share premium reserve comprises the total amount of non-restricted shareholders' equity, that is to say, the amount available for distribution to the shareholders.

Note 19 Risk management

Doing business inherently involves taking risks, and EOS Russia's risk management guidelines aim at supporting management in their daily work of decision making and operational activities with an optimal trade-off between risk and opportunity. The policies cover, inter alia, risk management, investments, segregation of duties and routines for financial reporting. It lays out detailed process descriptions for all main processes, such as bookkeeping, transaction management and investments. These will be developed continually over time.

EOS AB raises capital for EOS Russia via new share issues and also provides the group with corporate and administrative functions such as financial reporting, marketing and investor relations.

The board of directors of EOS AB is ultimately responsible for management of risks to which EOS Russia is exposed. EOS Russia's investment strategy is implemented by EOS Ltd, based on Cyprus, through which investments are made and owned. EOS Ltd makes all investment decisions within the framework set by the parent. This means that the board of EOS Ltd, will, based on recommendations from Pareto, make decisions about sale and purchase of Russian shares within the electricity sector. The execution of decisions made by the board of EOS Ltd will be carried out by the trader, or, either a director or employee on the mandate of the board of EOS Ltd.

Risk management during 2019

EOS Russia has assessed its risk exposure with the objective to identify key risks

The major risks were defined to be financial risk, country and sector risks.

Commercial and operational risks

EOS Russia was founded in 2007 in order to capitalise on investment opportunities arising as a result of the deregulation, restructuring and privatisation of the Russian electricity sector. Through the chosen investment strategy EOS Russia has a high exposure to country-specific risk factors for Russia, such as for example political, economic, legal risks. Also, EOS Russia is exposed to risks associated with investing in the Russian electricity sector only. While these risks are high for EOS Russia, they are also part of its business concept. EOS Russia's control policies cover the major internal processes, such as risk management, bookkeeping, routines for external and internal financial report, IT and administration.

The use of derivative instruments is subject to approval by the chief executive officer. The reason for using derivative instruments may be to eliminate a market risk or to obtain a gearing effect in accordance with our board of directors' mandate for leveraging.

EOS Russia depends on the continued services and performance of our founders, management and other key personnel.

Financial risk

Through its operations, the Group is exposed to various types of financial risks.

Financial risks are defined as fluctuations in EOS Russia's earnings and cash flow deriving from changes in exchange rates, interest rates, liquidity risk, credit risks and price risks. EOS Russia's finance policy for the management of financial risks has been formulated by the Board of Directors and forms a framework of guidelines and rules in the form of a risk mandate and limits for financial operations.

The financial risks are assessed and monitored by EOS Russia on a daily basis. The function head of risk and compliance is responsible for ensuring that there is adequate daily reporting of trading, leverage and currency exposure. Our chief financial officer is responsible for ensuring that there is adequate reporting of the group's current accumulated status (statement of financial position reporting) and the effects of changes since the previous reporting period (profit and loss reporting). Our board of directors may temporarily, until the next ordinary board meeting and if deemed to be in the best interests of the group, deviate from the risk management procedure without amending it.

Price risk

Price risk is the risk that the fair value of or future cash flow from a financial instrument will vary due to changes in market prices. There are three types of price risk: currency risk, interest risk and other price risks. In EOS Russia's operations share-price risk (other price risk) and currency risk are the most important price risks.

Share price risk (other price risk)

Share-price risk is the risk that the fair value of or future cash flows from a share will vary due to changes in market prices (regardless of whether the changes are caused by factors related specifically to the share or to its issuer, or to factors that affect all similar financial instruments that are traded in the market).

Share-price risk is a central risk in the group's operations, since these consist of making investments in various forms of shares and share-based derivatives in the Russian stock market with a specific focus on the Russian electricity industry. Share prices of shares held in the portfolio will fluctuate. This risk is part of EOS Russia' business concept and will not be hedged.

EOS Russia's holdings:
31 December 2019

		Number of shares
MRSK Volga	32.5%	21,601,566,439
MRSK Center & Volga	28.3%	7,056,099,106
MRSK Urals	16.2%	5,855,680,557
MRSK North-West	12.4%	13,810,392,893
InterRAO	4.6%	53,894,000
Lenenergo pref.	1.0%	500,000
OGK 2	0.2%	23,666,000
FGC	0.0%	2,600,000
UST-bills	4.7%	-
Totalt	100%	

A general decline of 1% in the value of EOS Russia's stock portfolio would effect equity by SEK -8,965 thousand (-7,590).

Exchange-rate risk

Exchange-rate risk is the risk that exchange-rate fluctuations may have a negative impact on our statement of comprehensive income, statement of financial position and/or cash-flow.

Exchange-rate risk can be divided into transaction exposure (based on commercial payments) and translation exposure (statement of financial position exposure). Foreign exchange transactions (spot, swap and forward) may only be made with banks approved in advance by the function risk and compliance. Speculation is not allowed and all hedging must be based on underlying exposure.

Translation-related exposure (statement of financial position exposure) relates to the effect of currency fluctuations on the net value of assets and liabilities in the consolidation of the group accounts.

EOS Russia's exchange-rate risks largely derive from translation exposure that arises from recalculation of a foreign subsidiary's assets and liabilities (USD) to EOS AB's functional currency (SEK), known as recalculation exposure. Translation-related exposure is not hedged.

The inflows and outflows in each currency shall be handled separately for the trading business and for the current operations. All borrowing in trading shall be done with the same currency mix as the future share purchase (matching). In order to obtain a full match, it may be necessary to hedge currencies with a financial institution.

Our inflows and outflows in each currency shall be matched by netting the different currencies. If the total remaining net exposure is greater than 10% of our net asset value, hedging shall always be considered and executed according to the decisions made the board of directors of EOS Ltd.

The risk for exchange rate fluctuations and the exposure's value and duration shall be taken into consideration when deciding whether or not to hedge.

It is incumbent upon the trader to continuously ensure that matching of currencies is executed. Though hedging is executed by the trader, it is the function risk and compliance's responsibility to approve each hedging transaction.

The consolidated statement of comprehensive income includes exchange rate differences in an amount of SEK 1,375 thousand (-988) in operating profit and SEK 0 thousand (0) in net financial items.

A 1% strengthening of SEK against USD on December 31, 2019 would imply a change in EOS Russia's equity of SEK -9,069 thousand (-8,381). The sensitivity analysis is based on all other factors (such as the interest rate) remaining unchanged.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows from a financial instrument will vary due to changes

in market interest rates.

For EOS Russia's operations, the interest rate risk arises when surplus liquidity is invested temporarily in interest-bearing securities. The interest rate risk also arises when EOS Russia finances operations by leveraging the stock portfolio. These interest rate risks are generally low, because the holding period is generally short in respect of investments in interest-bearing securities and is very short in respect of temporary leveraging of the stock portfolio.

When assessing the extent of the interest rate risk that EOS Russia is prepared to take at a specific point in time, an evaluation is made of the expected return on the assets that could be acquired in relation to the estimated financing cost.

At the end of the reporting period, EOS Russia's interest-bearing assets amounted to SEK 70,052 thousand (140,577) and short-term borrowing amounted to SEK 0 thousand (0). EOS AB's interest-bearing assets amounted to SEK 61,667 thousand (62,698), and SEK 0 (0) liabilities in the statement of financial position on the balance-sheet date.

Assuming a hypothetical one percentage point increase in market interest rates, also assuming a constant cash position, the effect on the EOS Russia's profit is SEK 636 thousand (1,406).

Liquidity risk

This is the risk that EOS Russia will be affected negatively by inefficient handling and control of cash and payment flows, in part because investments only can be converted to liquid funds with certain loss of value or time.

EOS Russia's future liquidity will depend primarily on timing and sales of investments, our management of available cash, cash distributions from our investments and from EOS Ltd, fees based on an advisory fee agreement with EOS Ltd, the raising of debt and capital contributions that we receive in connection with issuance of additional equity. In our opinion, we have sufficient working capital for our present requirements.

In accordance with the finance policy, there must be sufficient cash funds and committed lines of credit to cover operating costs over the following three months. While we intend to continue to be principally financed by equity, we may increase our leverage. Our financial policy allows a leverage of up to 40% in special situations, such as consolidations, break-ups, strategic sales, initial public offerings and market-moving industry events. The board of directors of EOS Ltd may resolve on leverage limits within the above mentioned framework. If deemed necessary, the function risk and compliance may temporarily restrict the limit of leveraging even further. Certain blocks of shares are used as collateral for leveraging. The function risk and compliance decides which blocks of shares that shall be pledged.

EOS Russia's financial liabilities at the end of the reporting period amounted to SEK 61,912 thousand (30,177), all with a due date within 12 months.

According to EOS Russia's financial policy temporary surplus liquidity shall always be invested to give the best possible return taking into account counterparty and liquidity risk. Surplus arising from our investment operations shall normally be invested in USD.

Credit risk

Credit risk is the risk that a party to a financial instrument cannot fulfill an obligation and thereby causes a financial loss for the counterparty. There are three main types of risk arising from the interaction with financial counterparties; delivery risk (primarily with brokers), credit risk and fraud. In order to minimize the delivery risk with brokers, a maximum of 10% of our net asset value may be used for prepayment (purchase of shares) or pre-delivery (selling of shares). Trades with values above 10% of our net asset value must be

executed according to one of the following prerequisites in order to minimize the delivery risk: (i) use of trading instruments such as Global Depositary Receipts, which constitute no risk for the trading parties involved; (ii) pre-delivery of shares before purchase or prepayment of shares before delivery when selling or (iii) the broker must be a highly respected financial institution. Our counterparties must be approved by the function risk and compliance.

Credit risk can arise in EOS Russia if it enters into derivative agreements and in certain cases if it invests temporary liquidity surpluses in interest-bearing securities. Accordingly, due to the focus of the operations, the credit risk that arises is limited. The credit risk in assets that are not due or written-down is assessed to be low since these assets are mainly held with banks with an AA- credit rating. Since for natural reasons the credit risk is low for operations, EOS Russia does not engage in any active credit risk management.

Establishing fair value

The following summarises the methods and assumptions used primarily to establish the fair value of the financial instruments reported in the table above.

(i) Financial instruments measured at fair value in the statement of financial position

In the table below information is presented regarding the financial instruments that have been accounted for at fair value using the fair value method. The implementation of IFRS 13 has led the Company to change the manner in which fair values are established for its investments in shares from using mid-prices to using current bid-prices quoted on Micex. For a description of the method applied

for valuation of financial instruments measured at fair value in the statement of financial position, see Note 1 above. In level 1, quotes for an active market, e.g. shares quoted on the Stockholm stock exchange, are applied. In level 3 the fair value is estimated based on a valuation method not founded on observable market data.

(ii) Financial instruments not measured at fair value in the statement of financial position

For accounts receivable and accounts payable, the carrying amount is considered to reflect the fair value because the remaining maturity is generally short.

Auditor's report

To the annual meeting of the shareholders of EnergyO Solutions Russia, corp. id. 556694-7684

Report on the annual accounts and consolidated accounts

Opinions

We have audited the annual accounts and consolidated accounts of EnergyO Solutions Russia for the year 2019. The annual accounts and consolidated accounts of the company are included on pages 3-43 in this document.

In our opinion, the annual accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of parent company as of 31 December 2019 and its financial performance and cash flow for the year then ended in accordance with the Annual Accounts Act. The consolidated accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the group as of 31 December 2019 and their financial performance and cash flow for the year then ended in accordance with International Financial Reporting Standards (IFRS), as adopted by the EU, and the Annual Accounts Act. The statutory administration report is consistent with the other parts of the annual accounts and consolidated accounts.

We therefore recommend that the general meeting of shareholders adopts the income statement and balance sheet for the parent company and the group.

Basis for Opinions

We conducted our audit in accordance with International Standards on Auditing (ISA) and generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the Auditor's Responsibilities section. We are independent of the parent company and the group in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of the annual accounts and consolidated accounts and that they give a fair presentation in accordance with the Annual Accounts Act and, concerning the consolidated accounts, in accordance with IFRS as adopted by the EU. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of annual accounts and consolidated accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts and consolidated accounts, The Board of Directors and the Managing Director are responsible for the assessment of the company's and the group's ability to continue as a going concern. They disclose, as applicable, matters related to going concern and using the going concern basis of accounting. The going concern basis of accounting is however not applied if the Board of Directors and the Managing Director intend to liquidate the company, to cease operations, or has no realistic alternative but to do so.

Auditor's responsibility

Our objectives are to obtain reasonable assurance about whether the annual accounts and consolidated accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and generally accepted auditing standards in Sweden will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts and consolidated accounts.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts and consolidated accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient

and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of the company's internal control relevant to our audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors and the Managing Director.

- Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting in preparing the annual accounts and consolidated accounts. We also draw a conclusion, based on the audit evidence obtained, as to whether any material uncertainty exists related to events or conditions that may cast significant doubt on the company's and the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual accounts and consolidated accounts or, if such disclosures are inadequate, to modify our opinion about the annual accounts and consolidated accounts. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company and a group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the annual accounts and consolidated accounts, including the disclosures, and whether the annual accounts and consolidated accounts represent the underlying transactions and events in a manner that achieves fair presentation.

- Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated accounts. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our opinions.

accounts, including the disclosures, and whether the annual accounts and consolidated accounts represent the underlying transactions and events in a manner that achieves fair presentation.

- Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated accounts. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our opinions.

We must inform the Board of Directors of, among other matters, the planned scope and timing of the audit. We must also inform of significant audit findings during our audit, including any significant deficiencies in internal control that we identified.

Report on other legal and regulatory requirements

Opinions

In addition to our audit of the annual accounts and consolidated accounts, we have also audited the administration of the Board of Directors and the Managing Director of EnergyO Solutions Russia for the year 2019 and the proposed appropriations of the company's profit or loss.

We recommend to the general meeting of shareholders that the profit be appropriated in accordance with the proposal in the statutory administration report and that the members of the Board of Directors and the Managing Director be discharged from liability for the financial year.

Basis for Opinions

We conducted the audit in accordance with generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the Auditor's Responsibilities section. We are independent of the parent company and the group in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a

basis for our opinions.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors is responsible for the proposal for appropriations of the company's profit or loss. At the proposal of a dividend, this includes an assessment of whether the dividend is justifiable considering the requirements which the company's and the group's type of operations, size and risks place on the size of the parent company's and the group's equity, consolidation requirements, liquidity and position in general.

The Board of Directors is responsible for the company's organization and the administration of the company's affairs. This includes among other things continuous assessment of the company's and the group's financial situation and ensuring that the company's organization is designed so that the accounting, management of assets and the company's financial affairs otherwise are controlled in a reassuring manner. The Managing Director shall manage the ongoing administration according to the Board of Directors' guidelines and instructions and among other matters take measures that are necessary to fulfill the company's accounting in accordance with law and handle the management of assets in a reassuring manner.

Auditor's responsibility

Our objective concerning the audit of the administration, and thereby our opinion about discharge from liability, is to obtain audit evidence to assess with a reasonable degree of assurance whether any member of the Board of Directors or the Managing Director in any material respect:

- has undertaken any action or been guilty of any omission which can give rise to liability to the company, or
- in any other way has acted in contravention of the Companies Act, the Annual Accounts Act or the Articles of Association.

Our objective concerning the audit of the proposed appropriations of the company's profit or loss, and thereby our opinion about this, is to assess with reasonable degree of assurance whether the proposal is in accordance with the Companies Act.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with generally accepted auditing standards in Sweden will always detect actions or omissions that can give rise to liability to the company, or that the proposed appropriations of the company's profit or loss are not in accordance with the Companies Act.

As part of an audit in accordance with generally accepted auditing standards in Sweden, we exercise professional judgment and maintain professional scepticism throughout the audit. The examination of the administration and the proposed appropriations of the company's profit or loss is based primarily on the audit of the accounts. Additional audit procedures performed are based on our professional judgment with starting point in risk and materiality. This means that we focus the examination on such actions, areas and relationships that are material for the operations and where deviations and violations would have particular importance for the company's situation. We examine and test decisions undertaken, support for decisions, actions taken and other circumstances that are relevant to our opinion concerning discharge from liability. As a basis for our opinion on the Board of Directors' proposed appropriations of the company's profit or loss we examined the Board of Directors' reasoned statement and a selection of supporting evidence in order to be able to assess whether the proposal is in accordance with the Companies Act.

Stockholm 28 April 2020
Öhrlings PricewaterhouseCoopers AB

Magnus Svensson Henryson
Authorized Public Accountant

Board of Directors

The board of directors of EOS AB is elected at the annual general meeting. The board of directors is responsible for the administration of EOS Russia on behalf of the company's owners. The Board establishes goals and strategies, and evaluates the operative management. The board of directors is also responsible for ensuring the release of correct information to EOS AB's shareholders, and that laws and regulations are complied with. The articles of association state that EOS AB's board of directors shall consist of not less than four and not more than six members. None of the board members is an employee of the company. The board of EOS AB consists of members with competence and experience, which is of great importance in supporting, following and directing EOS Russia's operations.

Our current board consists of:

Seppo Remes

Co-founder and Chairman of the Board since 2007

Seppo Remes, Co-Founder and Chairman of the Board since 2007 Finnish citizen, born 1955. Mr. Remes is a co-founder of EOS Russia AB and currently serves as the chairman of the board of directors in the company. He has served as a board member of several Russian companies, such as UES of Russia, Sibur Holding, Rosseti, Rusnano and OMG. Mr. Remes also is a board member of the Investor Professional Association (IPA) (Russia). As of 1 April 2018, he was appointed as Professor of Practice at Lappeenranta Technical University, School of Energy Systems.

He holds a licentiate degree in Economics from Turku School of Economics (Finland).

Mr. Remes has 305,000 shares in EOS Russia AB.

Lars Bergström

Board Member since 2015

Swedish citizen, born in 1965. Following a short career as a Swedish diplomat, Mr. Bergstrom was recruited by Harvard University in 1993 to join the Privatization Center of the Government of Russia to advise on corporate governance and capital markets.

Thereafter he established the Russian investment banking operations of Alfred Berg/ABN Amro, established and managed SEB Enskilda's Russian operations and more recently worked at Carnegie Investment Bank in Stockholm, and managed its Russia/CIS related business.

Mr Mr. Bergstrom is currently a Carnegie Investment Banking Advisory Board Member and a Board Member of the Swedish Chamber of Commerce for Russia and CIS, actively involved in promoting and facilitating trade and investments between Scandinavia and Russia for more than 20 years.

Mr Bergström does not own shares in EOS Russia AB.

Christopher Granville

Board member since 2011

UK citizen, born 1963. Mr. Granville is a member of the Board of Directors of EOS AB. Mr. Granville is a Board Director and Managing Director of Trusted Sources, an independent investment research firm specializing in emerging market countries. Mr. Granville is also a member of the Investment Committee of Olma Private Equity Fund.

Previously, Mr. Granville was a Partner at United Financial Group (UFG), where he worked as Chief Strategist from 2000 to 2006.

He holds a MA in Modern History & Modern Languages from Oxford University (UK).

Mr. Granville does not own shares in EOS Russia AB.

The Board's Rules of Procedure

In addition to laws and recommendations, the work of the board of directors is governed by rules of procedure. According to the rules of procedure for the board of directors, the board members shall attend at least four meetings during the fiscal year in addition to the inaugural board meeting. Furthermore, the board shall also evaluate the work done by the CEO and in some cases approve of the CEO's potential positions outside of EOS Russia. The board's rules of procedure also include instructions for the CEO as to how the financial reports shall be presented to the board. The rules of procedure state that the chairman of the board of directors is responsible for the monitoring of the development of EOS Russia, by maintaining an ongoing dialogue with the CEO, and to ensure that the CEO provides the members of the board with the information that they require.

Board Activities in 2019

EOS Russia's current board of directors was elected at the AGM held on May 21, 2019. During 2019, the board of directors of EOS AB held 6 meetings. The main focus for the board of directors during the year was the company organisational structure, the share repurchase program as well as discussion and approval of financial statements.

The board of directors conducts its work in accordance with its rules of procedure. Every ordinary board meeting has a fixed agenda with items to be resolved upon, which includes an update by the CEO on the performance of the company.

Board Remuneration

On the AGM held on May 21, 2019, it was resolved that the remuneration of the board until the end of the next annual general meeting shall amount to SEK 840,000, pro rata according to the table set out below.

Committees

Audit Committee

In light of the size of the board of directors and as the nature of accounting and audit issues are not more complicated than that the work can be handled directly by the board, the board of directors does not deem it necessary to establish an audit committee. Instead, the duties that would be assigned to such committee will be performed by the board of directors as a whole.

In order to ensure the quality of the financial reports, the chief financial officer is present during the board meetings addressing financial reports. The chairman of the board of directors communicates with the company's auditors, and the auditor shall be present on the board meeting at which the annual accounts shall be addressed.

Remuneration Committee

In light of the size of the board of directors and the limited number of employees in EOS Russia, the board of directors does not deem it necessary to establish a remuneration committee. Instead, the duties that would be assigned to such committee will be performed by the board or directors as a whole.

Overview of Board Member Meeting Attendance and Independence

Board member	Elected	Position	Independent of company	Independent of major shareholders	Board meeting attendance during 2019
Seppo Remes	2007	Chairman	No	Yes	6/6
Christopher Granville	2011	Board member	Yes	Yes	6/6
Lars Bergström	2015	Board member	Yes	Yes	6/6

The table sets forth the board members' independence of the company and of major shareholders. Seppo Remes currently has a management agreement via Pareto with EOS Ltd. consequently, he is not deemed to be independent of EOS Russia.

Overview of Board Member

Board member	Elected	Position	Board remuneration (SEK thousand)
Seppo Remes	2007	Chairman	280
Christopher Granville	2011	Board member	280
Lars Bergström	2015	Board member	280

Nomination Committee

The company shall have a nomination committee consisting of a representative of each of the two largest shareholders or groups of shareholders, based on the number of votes, together with the chairman of the board. If any of the two largest shareholders declines to appoint a member to the nomination committee, additional shareholders are, by order of size, to be offered appointment until two members are appointed. The chairman of the board shall be chairman of the nomination committee. If a shareholder representative no longer represents the shareholder in question or for any other reason leaves the nomination committee before its work is completed, the shareholder in question shall be entitled to appoint a new member to the nomination committee. A shareholder who has appointed a member to the nomination committee has the right to remove such member and appoint a new member to the nomination committee. In the event a shareholder that has appointed a member is no longer one of the two largest shareholders, the appointed member shall resign and be replaced by a new member in accordance with the above procedure.

The appointed Nominating Committee for the AGM for 2020 consists of: Roman Filking (representing Prosperity Capital Management), Simon Westlake (representing City of London Investment Company) and Seppo Remes (Chairman of the Board of EOS Russia AB).

The tasks of the Nomination Committee include providing a proposal for election of the chairman and other members of the board of directors of EOS AB, board remuneration, chairman of the AGM, and, if applicable, election and remuneration for the auditors and the principles for the composition of the Nomination Committee. The Nomination Committee's proposals are presented in the notice to attend the AGM and are simultaneously published on EOS Russia's website. The proposals are also presented to the shareholders on the AGM.

The members of the Nomination Committee for the 2020 AGM have had informal contacts in topics such as, inter alia, the chairman of the AGM, the board of directors, the chairman of the board, board fees and audit fees have been

discussed. The Nomination Committee has discussed the size and composition of the board of directors in terms of industry experience and expertise, among other things.

Management

The CEO of EOS Russia, Ulf-Henrik Svensson, has the responsibility for EOS Russia's day-to-day operations.

Ulf-Henrik Svensson

Chief Executive Officer of EOS AB since 2009

Swedish citizen, born 1970. Before joining EOS Russia, Mr. Svensson held several positions at Swedish Match, including Director of Business Control at North Europe Division in Sweden and Division Controller at Swedish Match Continental Europe Division in the Netherlands.

He holds a BA degree in Business Administration from Stockholm School of Economics and also studied various courses in Law.

Mr. Svensson has 0 shares in EOS AB.

Management Remuneration

EOS Russia aims at offering its management team members remuneration that reflects current remuneration levels in the market. Criteria for remuneration are based on the level of experience and competence needed to perform the tasks along with performance and the significance of tasks performed.

Auditors

Öhrlings PricewaterhouseCoopers Aktiebolag
At the AGM held on May 21, 2019, Öhrlings Pricewaterhouse Coopers Aktiebolag was appointed EOS Russia's auditor for the time until the next AGM, with Magnus Svensson Henryson as the auditor in charge. He is a Swedish citizen, born 1969. Mr. Henryson is an Authorized Public Accountant and a member of Far (institute for authorized public accountants, approved public accountants and other highly qualified professionals in the accountancy sector in Sweden).
